B. DECLARATION

1. Our vision

Deca Packaging Group (“DECA”) and all its subsidiaries want to be a successful, profitable and growing company. DECA is active in the manufacture and sale of high-quality innovative plastic packaging, filling- and handling machines and glass and tin packaging, mainly for the food industry.

2. Continuous improvement

By continuously improving our organization and our processes, we want to produce and trade high-quality products with highly added value. We are aware of packaging’s importance in guaranteeing food safety and its function in marketing.

3. Our operations

Our operation make use of the most modern technologies, are efficiently organized and optimize capacity utilization. This creates added value and minimizes environmental impact.

Environmental impact is reduced by minimizing production waste, by exclusive use of energy from renewable resources (including the solar panels installed on the roof of the commercial building), by using energy present in cooling water to heat offices and loading docks and by producing packaging in such a way that less raw materials and energy are needed. Additionally, transport is minimized because we have our own mould producer which can provide our factory with moulds for both our injection moulding- and thermoforming machines.

4. Our activities

We prioritize (food)safety and compliance with legislations relating to our activities. Our aim is to protect and promote the health and well-being of everyone.

5. Special measures

We take special measures to prevent contamination by foreign objects (dust, stones, insects, hair, ...) and particularly sharp objects (glass, broken knives, ...).

6. The preferred supplier of our costumers

We want to provide our customers with perfect products and services that meet and exceed expectations and customer requirements.

7. People

People are important to us. We are committed to uphold a culture that promotes creativity and development of employees. We do this by giving authorized employees ample decision-making power and by promoting cooperation. The ETI base code (www.ethicaltrade.org), national and international legislation are used as minimum standards for ethical business.

8. Structure

All of the above is structured according to the requirements of the standards of **BRC / IOP, ISO 9001, ISO 14001 and SMETA**. DECA is committed to always meet the requirements of these standards and will provide the means to do so.
